

Save a Place

View this example [full screen](#).

JavaScript

JavaScript + HTML

```
/*
 * When you add a marker using a Place instead of a Location, the Maps API
 * will automatically add a 'Save to Google Maps' link to any info window
 * associated with that marker.
 */

function initialize() {
  var mapOptions = {
    zoom: 17,
    center: {lat: -33.8666, lng: 151.1958}
  };

  var map = new google.maps.Map(document.getElementById('map-canvas'),
    mapOptions);

  var infowindow = new google.maps.InfoWindow();

  var marker = new google.maps.Marker({
    map: map,
    // Define the place with a Location, and a query string.
```

```
place: {
  location: {lat: -33.8666, lng: 151.1958},
  query: 'Google, Sydney, Australia'
},
// Attributions help users find your site again.
attribution: {
  source: 'Google Maps JavaScript API',
  webUrl: 'https://developers.google.com/maps/'
}
});

// Construct a new InfoWindow.
var infowindow = new google.maps.InfoWindow({
  content: 'Google Sydney'
});

// Opens the InfoWindow when marker is clicked.
marker.addListener('click', function() {
  infowindow.open(map, marker);
});
}

google.maps.event.addDomListener(window, 'load', initialize);
```
