

ITMD-461

Class 9
October 22, 2014

Agenda

- Midterm Review
- Continue CSS Demos

Assignment – Home Index Page

- Create a index.html page for your root server directory to serve as a landing page.
 - Must be named index.html so it is the default page served when visiting `libertyville.rice.iit.edu/yourusername/`
- Page should be an introduction page for you and the class. Please include stuff like your name, class number and name, maybe a paragraph of what you want to accomplish in the class.
- Most importantly I want a list or table that will be a listing of your assignments and links to them. Right now the only assignment you will have to link to is the Forms controls assignment.
- Use an image somewhere.
- **Use CSS to style the page. Use an External Style sheet. Not embedded or inline css.** I don't want to be able to see any of your elements having the browser default styling.
- **Must use a non-standard CSS web font as demonstrated in class.**
- **File must be uploaded to the server in addition to uploaded to the blackboard assignment.** Also submit to blackboard the URL to your server account. (ie, `http://libertyville.rice.iit.edu/IITUserName/`)
- Assignment will be graded based on following all requirements and instructions in addition html and css syntax correctness. There will also be a component of the grade based on how much effort you put into the content and styling on the page. Extremely basic content and minimal css will not get full credit.
- **Due November 3** – 30 points possible
- Detailed Blackboard Assignment posting will be posted in blackboard later this week to submit you URL and file to.
