

Weather layer

Note: The Weather library - which includes the Weather and Cloud layers - [has been deprecated](#) as of June 4, 2014. This library will continue to work until June 4, 2015. After that date, the library will no longer be available. An alternative solution is to use OpenWeatherMap with the Google Maps JavaScript API. A [guide is available on GitHub](#) that describes this solution and suggests other alternatives.

JavaScript

JavaScript + HTML

```
function initialize() {  
  var mapOptions = {  
    zoom: 4,  
    center: new google.maps.LatLng(49.265984, -123.127491)  
  };  
  
  var map = new google.maps.Map(document.getElementById('map-canvas'),  
    mapOptions);  
  
  var weatherLayer = new google.maps.weather.WeatherLayer({  
    temperatureUnits: google.maps.weather.TemperatureUnit.FAHRENHEIT  
  });  
  weatherLayer.setMap(map);  
}
```

```
var cloudLayer = new google.maps.weather.CloudLayer();
cloudLayer.setMap(map);
}

google.maps.event.addDomListener(window, 'load', initialize);
```
